

FOR IMMEDIATE RELEASE

MOUNTAIN OFF-ROAD ENTERPRISES: NEW DUAL BATTERY TRAY FOR 2012+ JEEP WRANGLER

Delta, CO – September 25, 2012 – MOUNTAIN OFF-ROAD ENTERPRISES (M.O.R.E.) has launched its all-new dual battery tray for 2012+ Jeep Wrangler JKs equipped with the Pentastar 3.6L engine.

The first company to offer an aftermarket dual battery tray solution for this application, M.O.R.E. is able to offer their tray (SKU JKDBT12) for an incredibly reasonable price of just \$135.00 USD.

Users can enjoy the added benefits of having extra power to run a winch, lighting, demanding electrical accessories or more or can simply lessen the worry of encountering a dead battery out on the trails by utilizing an additional battery.

Powder coated black to protect against rust and corrosion while also offering a sleek appearance that blends in with the factory engine bay, M.O.R.E.'s 2012+ Jeep Wrangler JK dual battery tray accommodates two OEM or two Optima series 34 and 34/78 batteries in a side-by-side configuration in the stock location.

Sold as a complete kit and designed to utilize existing holes, most hardware and requiring no drilling or major modifications, the quick and easy installation is typically complete in less than two hours. As an added benefit, the M.O.R.E. dual battery tray also allows for the user to retain the OEM air filter box location.

To learn more about M.O.R.E.'s 2012+ Jeep Wrangler JK dual battery tray, visit <http://www.youtube.com/watch?v=ryUnbnxom2o>.
